## Course description

“Techniques in Surgical Instrumentation” is designed to prepare the student to successfully complete the International Certification Examination for Instrument Specialist. The course provides students with information and principles upon which they may base decisions and work in the field of Central Service and Surgical Services.

The course material will include sterilization, processing, packaging, identification, inspection, handling, assembly and usage of all instrumentation.

Also welcome are persons presently employed in Central Service, Operating Room, Ambulatory Surgery, and Supervisors responsible for these areas.

---

## Technician

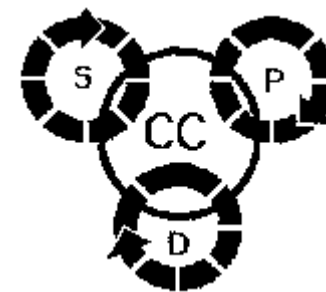

### Eligibility Requirements:

This course is designed to advance the Certified Technician with additional training in instrumentation. This will prepare the student to take and pass the Certified Instrument Specialist (CIS) exam developed through the IAHCMM. There is a clinical requirement of 200 hours at a primary care facility prior to taking the International Certification examination.
